## ABOUT THE CONFERENCE

This program is a continuity of our annual regional conference in diabetes which addresses state of the art knowledge in the diabetes field. As a center of excellence in diabetes, we always strive to improve the knowledge in the region about the disease and its underlying complications.

## PROGRAM TOPICS

The conference has assembled a 2-day conference which will provide participants a platform to exchange ideas, enhance their skills and knowledge for the benefit of diabetes and control of its complications. The main topic of the conference program is:

- Genetics and Immunology
- Obesity Management
- Customized Therapy in Type 2 DM
- Management of Diabetes in Special Population
- Diabetes Complications

## ACCREDITATION

The accreditation for the 6th Regional Conference on Diabetes 2018 is sought by the UAE Ministry of Health (MOH)

## LEARNING OBJECTIVES

Upon completion of this program, each stream will include lectures that will be held in a variety of formats to allow for constructive interaction and to share best practices in diabetes care with the education objectives to:

- Address the latest results in diabetes research, current issues in therapy and education
- Interact with diabetes, endocrinology, and research experts on a specific topic
- Promote interactions related to controversial topics
- Appreciate the complications of diabetes, its prevention, and treatment
